Profile

Recent software engineering graduate with solid Java and SQL foundations and a first exposure to SAP. Completed the SAP learning journeys on ABAP Cloud and RAP and built a small RAP application during the final-year internship. Motivated to grow as an SAP ABAP developer.

Experience

Final-Year Intern – SAP team **Feb 2025 – Jul 2025**
IT services company *Fes, Morocco*

- Built a simple RAP business object (managed, without draft) to register equipment loans, with one validation and a Fiori Elements List Report.
- Wrote CDS view entities and tested OData V4 services in the service binding preview.

Web Developer Intern **Jul 2024 – Aug 2024**
Local web agency *Fes, Morocco*

- Maintained a Java Spring Boot back end and MySQL database for a booking website.

Projects

Library Management System **2024**

- Java desktop application with JavaFX and MySQL to manage books, members and loans.
- **Technologies:** **Java** | **JavaFX** | **MySQL**

Personal Portfolio **2023**

- Responsive personal website with HTML, CSS and JavaScript.
- **Technologies:** **HTML** | **CSS** | **JavaScript**

Education

Master in Software Engineering **2023 – 2025**
Faculty of Sciences *Fes, Morocco*

Skills

- **SAP:** ABAP basics, CDS view entities, RAP (basics), Fiori Elements preview, Eclipse ADT.
- **Programming:** Java, SQL, JavaScript, HTML, CSS.
- **Tools:** Git, GitHub, MySQL Workbench.
- **Learning:** SAP Learning Journey “Acquiring Core ABAP Skills” (completed).

Languages

- Arabic (native), French (fluent), English (intermediate).
